

CRESCENT ENGINEERING

PRESENTS:-

QUICK SOLUTIONS

NOW

DESIGN FASTER USING OUR QUICK ADD-INS

- PROBLEM: Unable to locate the file path of the active SolidWorks document?  
 SOLUTION: **Path Finder** – With the help of this addin the designer will be able to pin-point the location of the active document for backup, share, etc.
- PROBLEM: Not able to keep track of drawing referred by other departments?  
 SOLUTION: **Multi-Save** – This addin save your drawing files at multiple locations at the same time so all departments (Manufacturing, Quality, Purchase, etc.) are referring the same revision. Export file is DWG, PDF & SolidWorks native.
- PROBLEM: Lot of design time wasted to create assembly exploded views?  
 SOLUTION: **Auto-explode** – Creates exploded views automatically.
- PROBLEM: Hardware resources not able to run SolidWorks properly?  
 SOLUTION: **Keep drawings** – This addin closes all open documents except open drawing files so you do not use more than required resources.
- PROBLEM: Not able to separate different drawing sheets in one drawing file?  
 SOLUTION: **Drawing sheet export** – Export all drawing sheets in one drawing file separately.
- PROBLEM: Have to save different files individually?  
 SOLUTION: **Selective Save** – This addin saves only the file you select among all open files.
- PROBLEM: Need custom features in one click?  
 SOLUTION: **CreatePane** – Create customised Task Panes with your shortcuts.
- PROBLEM: Difficulty exporting your files to proper PDF as per company standards?  
 SOLUTION: **PDF Export** – Control how to export your SolidWorks drawing file into
- PROBLEM: Waist time on identical parts  
 SOLUTION: **Save Mirror part** – Directly save mirrored component from the original part file.
- PROBLEM: Not able to open new/existing document in background?  
 SOLUTION: **Background Open** – This addin can open any existing or new SolidWorks document in the background preserving your active document.
- PROBLEM: Frustrating to add properties in BOM table at the end.  
 SOLUTION: **File Property binder** – This addin adds custom properties to your existing or new files.
- PROBLEM: Have to manually rename all your Drawing sheets.  
 SOLUTION: **Rename all sheets** – This addin allows you to rename all your drawing sheets in a drawing file in one instance.
- PROBLEM: Have to rename finished part/assembly files for archiving data manually  
 SOLUTION: **Custom Archiving** – Create pack and go with specified custom property as prefix/suffix.
